Sy C. B. McDowell

COTTON BALES EURN The Elba Fire Department was called to the Morrow Cotton Warehouse Monday morning at 7:25 to fight a fire involving four bales of iotton. Three bales were badly damaged.

FAMILY REUNION Thirty-one children and grand children assembled at the nome of Mr. & Mrs. W. F. Fortner on Christmas Day for an enjoyable family reunion. A sumptuous dinner was served. Mr. Fortner said he always makes it a point to stay at home on Christmas Day and have his children and grandcallaten visit with him. No ganvanting about for him on Christmas or Thanksgiving Days

ENJOYABLE HOLIDAYS Unlike my good friend, "Uncle Frank" Forther," I gallvanted about during the Christmas and New Year's holidays.

My v.fe, son Roy, daughter.

Mrs. Ma 7 Newton, and I spent
the Christmas weekend in Monticello, Fla. with relatives. There we met another son, Dr. D. F. McDowell of Decatur, Ga. He accompanied us to Elba on Monday after Christmas. After visiting us three days, Mrs. Mc-Dowell, Mrs. Newton and I accompanied Dr. McDowell to Decatur where we visited relatives until Sunday. Yes. I galivanted about, but I enjoyed it exceedingly.

RIVER ROAD STARTS Commissioner Flournov Whitman was all smiles Tuesday morning because work was beginning on the River Road. This highway starts at the Elba-New Prockton highway near the municipal swimming pool and connects with the Samson highway near the Harold English home. One lef goes to In while t e other meets the Samson road. Mr. Whitman said the rightof-way is 80 feet wide and the blacktop is to be 20 feet in

The Elba Clipper

with a Savings Plan that really works

you've tried to save before and failed, charges are it was because you didn't have a plea. Well, here's a savings plan that really works - the Payroll Savings Plan for investment in U. S. Savings Bonds.

The time to start is now. Did you, like millions of American workers, receive a Bonus check? If so, there extra money that you weren't counting on. Don't ! it slip through your fingers. This year get smart and put it aside for some worthwhile savings purpose. Start the New Year and your savings plan out right by investing Bonus money in safe, reliable, good-paying U.S. Saras Savings Bonds.

The follow-through is important. It's important to start out right-even more so to follow through on your good intentions. So go to your company pay office today and sign up for the Payroll Savings Plan. After that, your saving is done for you automatically. Each payday any amount you designate will be set aside for you and invested in U. S. Savings Bonds. These Bonds earn interest at the average rate of 3%, compounded semiannually, when held to maturity. After maturity they go on earning that same fine interest for another 10 years if you wish, giving you a return of 80% on your original investment.

Here's the pay-off. Save as much or as little as you want. But the more you save, the bigger your returns. If you save \$3.75 a week on the Plan, in 9 years and 8 months you'll have \$2,137. In 19 years and 8 months your savings will have grown to \$5,154. A weekly investment in Bonds of \$7.50 grows into \$10,313 in 19 years and 8 months.

U. S. Savings Bonds offer you a safe, sure way to save . . . the Payroll Savings Plan is the easiest way to buy Bonds.

Folsom, you can see the enced by conflicts of personalities, jurisdic- office building where educators on the tional disputes between school boards, at- state staff have records of other such maltempts of some school administrators to functions in different counties. Without build an "empire" and popularity of the naming counties, men in the state departdecision. Net result is that often the most ment have told me of one county building judiciuious use of school money is not made a school which cost well into six figures at and actual education of the children is not a site far removed from any center of population. Now, to keep classrooms full, they To cite an example, we will relate what are using more tax money to transport pupils to the building. It is as morally wrong

as if they had built a school in Atlanta, Ga. and hauled students to classes there. Another instance cited was similar to Coffee County. At the request of the county concerned, the state department made a survey and recommended consolidation of rural schools. Two years later men from the state department had an occasion to return and they found seven one-room school uses had been established.

These cases and many more could be dug from the files of the State Department of Education. Net result is the waste of no one knows how much tax money and poor education for the students. These are luxuries the State of Alabama can ill afford. This comes at a time when industry is moving South and the youth need more and better instruction to insure their own wellbeing and to insure the continued progress

Our remedy for the situation is to give trained educators on the state level more authority. If the State Department of Education spends good tax money on a survey, hires experts to project results of the sur-HOME for a few days were my cousin Betty Burks (Quaries) Mathews, husband Robert, and bettite young Mary Jane. King of the WWW frontier.

Even b'ar killers need protection, Master Crockett. Seven million youngsters got the first Salk polio vaccine in 1955. Your March of Dimes funds developed this vaccine, tested it, provided the first shots within days after it was proclaimed safe and effective. Now, March of Dimes research is making it even more effective. But we must still remember those, born too soon to be protected by the vaccine, who still need care and those tens of thousands who will be stricken in polio epidemics before the vaccine is made even more effective.

\$15,611.28

Just like the other 890 rural electric systems in this country, we pay many taxes.

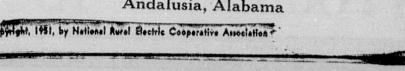

For instance, we all pay property taxes. Latest figures show that just the property taxes alone paid by rural electric associations over the nation were 1.67 percent of the total revenue received by the co-ops from their members. Your locally-owned and operated rural electric cooperative, managed in a business-like manner, is a tax-paying and interest-paying organization organized and operated by its members under Federal and state laws.

Funds borrowed from REA by rural electric systems (and they are only a loan) are but a fraction of what has been advanced to self-styled "free enterprise" by other government agencies during the depression, war years and even. now in this mobilization period.

We pay taxes. Let's set the record straight.

Charles Talbot, forester for Coffee County, is one man who practices what he preaches. He is shown among the threeear-old pines he put on 40 acres of his land. Garry, his 20onth-o'd son pictured with him, should be able to go to llege on the proceeds from the sale of timber from this and in 15 years. Mr. Talbot figures it this way: 40,000 pine trees were set out and will increase in value at the rate of 5c each per year. That amounts to \$200 a year or \$3,000 in 15 years, about the time Garry will be ready for college. Aside from keeping fire lanes maintained in his tree farm, he has little to do besides let nature take its course. (Clipper)
